Started task

Check whether the pitch demo is ready to record

Optional continuation after reading GitHub branch promo/wareorb-video in POTATO0826/Bababoi. Read promo/HANDOFF.md and promo/pitch/pitch-plan.md from that branch. With the user's chosen scope, inspect the intended backend-production demo build and identify current sign-in and recording blockers. Preserve the existing checkout and product source; do not render or record before the documented prerequisites are met. Use the Clerk and environment-secrets skills for any authentication setup; never request credentials

Marked task #2 (Check whether the pitch demo is ready to re...

The pitch demo is not ready to record. Nothing has been rendered or recorded, and no product source or checkout was changed.

Blockers

1. **Clerk setup is still undone (documented, not testable here).** The handoff s ush of the app's functions is stopped on `CLERK_JWT_ISSUER_DOMAIN`.

Task Plan

WareOrb Extended Launch Film Preview

What & Why

The delivered 21 s WareOrb promo shows the earlier prototype UI. The finished product (`backend-production` @ `4c2cc97`) now has measured and human-confirmed receiving, Start sale, an approval guard, Lalamove sandbox quotes (quote only) and the Jarvis agent. This task produces a new, longer launch film concept (recommended ~38 s, 1920x1080, 30 fps, code-synthesised music and SFX, no voice) and a review pack: storyboard, representative keyframes and a short motion preview. The delivered 21 s film stays untouched, and no final high-quality render is made until the user approves the preview.

Source material is on GitHub (`POTATO0826/Bababoi`): branch `promo/wareorb-video`, folder `promo/` (read `NEXT-AGENT.md`, `VIDEO-EXTENSION-HANDOFF.md`, `VIDEO-CAPABILITY-AUDIT.md`, `storyboard.md`, `render-instructions.md`, `HANDOFF-promo.md` sections 3 and 5) and product branch `backend-production`. The renderer harness is `promo/source/harness/src3/` on the video branch. Fetch those branches with git; they are not in this workspace's main branch.
